

Stainless Steel Floor Pedestal

General Specifications

The Floor Pedestal shall be an Amico Alert-1 series.

The floor pedestal shall be made of stainless steel with a #4 satin finish.

It shall be capable of holding medical gas outlets and electrical devices within the structure of the unit.

The electrical devices are provided with electrical boxes and 18" flex conduit and wire. Provided wire is #12, stranded copper THHN, 600 volt insulation (or RW90 XLPE, 600 volt insulation in Canada) for hot and neutral (black and white respectively). Grounds shall be #10, THHN (or Type R, RW90 XLPE in Canada) stranded copper wire (green). All ground conductors are installed in conduit. Receptacles will be installed with ground pin up.

There are (5) standard sizes to choose from:

- Small Shell - 12" x 10" x 20" (305 mm x 254 mm x 508 mm)
- Large Shell - 18" x 10" x 20" (457 mm x 254 mm x 508 mm)
- Short Pedestal - 7" x 10" x 20" (178 mm x 254 mm x 508 mm)
- Short Sloped - 10" x 16" x 23" (254 mm x 406 mm x 584 mm)
- Sloped Pedestal - 13" x 16" x 23" (330 mm x 406 mm x 584 mm)

The Floor Pedestal is rated for 120 to 240 V max, 50-60 Hz.

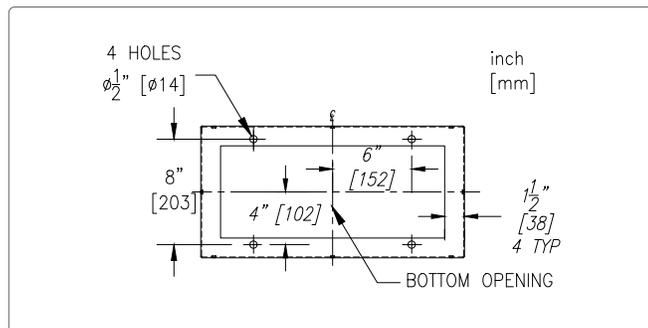

The Floor Pedestal is UL Listed to U.S. and Canadian safety standards.

Features

- Stainless steel shell for aesthetic appearance.
- All devices and gas outlets are accessible through the access panel on the back of the pedestal or the removable top.
- Custom sizes are available upon request.

Installation

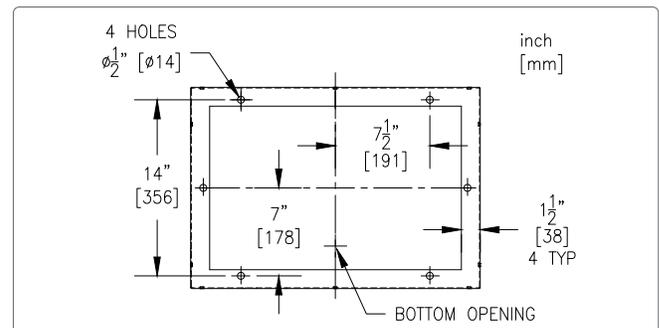

Use four 3/8"-1/2" (9.53 cm - 12.7 cm) diameter mounting bolts (provided by contractor) to mount the pedestal securely on the finished floor. Remove the top cover and access panel for piping and wiring.

*sample bottom opening size shown based on 10"Wx20"L pedestals

Outlet Styles:

- DISS
- Chemetron
- Oxequip
- Puritan-Bennett
- Ohmeda

*sample bottom opening size shown based on 16"Wx23"L pedestals
