See How

The NuLook Refresh Process

Original Hospital Room

We test the performance of your current system.

Remove All Existing Fixtures

Without breaking into the wall or cutting pipes.

Hang the Prefabricated Frame

The NuLook frame and adapters are then installed, retrofitting, and relocating your existing outlets.

Attach Panels and Complete Your NuLook Room

The entire process took less than 4 hours!

NuLook for Any Condition

INSTALL OVER EXISTING CONSOLES

Increase your room's functionality by installing over top of existing gas console boxes while recessing the bed location to maximize bed clearance. Integrate recessed equipment rails for better equipment management.

RETROFIT UNSERVICEABLE HEADWALLS

Replace headwalls made by past manufacturers who no longer provide parts or service. NuLook allows you to bring unserviceable headwalls back into operation in live areas, all without construction or recertifying.

NuLook for Every Need

BE UNIQUE, CUSTOMIZE YOUR DESIGN

Transform your LDR with our custom design capabilities, regardless of the existing conditions. Custom graphics, lighting, and layout allows you to make your rooms truly unique without exceeding your budget.

UPGRADE YOUR ROOM AND DESIGN

Increase electrical circuitry and create a home-like environment. Maximize patient and nurse comfort with graphic panels and integrated bedside cabinets.

NuLook for Every Acuity

INCREASE PATIENT AND NURSE SATISFACTION

With NuLook anything is possible; conceal gases behind sliding panels. Installs in any existing condition, increasing your patient and nurse satisfaction, while avoiding the time and cost of a traditional gut and renovation.

CONVERT EXISTING SEMI-PRIVATE ROOMS INTO PRIVATE

The system has been designed to install in any condition. We floor mount our unit when working with pre-existing plaster walls in order to provide greater structural support. NuLook gives you the flexibility to convert your rooms from semi-private into private.

NuLook for Every Budget

UPGRADE WITH LESS DOWNTIME

Improve infection control, usability, and aesthetics in your existing OB suites. NuLook's fully integral design process allows us to achieve your goals without the need to recertify.

LIMITLESS DESIGN CAPABILITIES

NuLook comes in all shapes and sizes. Update your outlets, increase infection control, and stay within your budget.

The Possibilities are Endless

NULOOK

Solutions

Bringing Non-Disruptive Change to Your Facility

Refresh

Construction-free system that installs without the need to recertify, allowing for non-disruptive change to your existing facility.

Casework

Future adaptable and demountable casework prefabricated with industry leading durability, warranty, and flexibility.

FlexWall

Adaptable prefabricated system that will adapt, change, and be ready for the rapid evolution in healthcare design.

Skeleton

Prefabricated stud-frame system engineered to streamline the conventional construction process.
