

Patient Room Furniture

Amico

Designed by You – Manufactured by Us

Customizable Designs to Help Your Workflow

Amico Patient Care specializes in working with facilities to tailor their products to fit every unique environment. When working with a clinical team, our goal is to not only make your products work better for you, but also be more user friendly for your patients. At Amico we realize that it is the little things that really matter; whether it be custom colors, intuitive accessories, specific dimensions or new designs. It is our goal to have the product work for you.

- Ability to create designs with exact dimensional requirements.
- Match any color to existing casework already in the room.
- Provide multiple Infection control friendly surfaces with our thermofoil, antimicrobial, and solid surface materials.
- Have a wide variety of IT mounts to improve working ergonomics.
- Lowest overbed table base in the industry to ensure it works with every bed.

We look forward to consulting with you on your design needs!

Low Profile Base for All Beds

Coordinate with Your Patient Room

Specialty Tops for All Patients

Overbed Tables

Amico's Overbed Tables combine an attractive, ergonomic design with infection-resistant features. Our thermofoil tops provide durability and a seamless spill guard edge to reduce infection control issues. For even further infection control security, we also provide antimicrobial material tops. Manufactured with the lowest base in the industry, our Overbed Tables move easily under any hospital bed or recliner*. An integrated rail allows accessories to be transferred from the headwall to the table for patient use.

Bedside Cabinets

Amico's bedside cabinets feature contemporary designs and durable construction to meet the demanding needs of today's healthcare environment. Manufactured using seamless thermofoil and high-pressure laminate, these cabinets come with various hardware and drawer front styles to choose from. With different drawer configurations and optional features including casters, drawer liners or spill guard tops, our Bedside Cabinets can be customized to suit any existing décor.

Jasper Series (Laminate)

Oliver Series (Thermofoil)

Lucas Series (Laminate or Thermofoil)

Labor and Delivery

We know that the birthing experience is never the same from patient to patient, so at Amico, we build our Labor and Delivery equipment to suit your unique environment.

Nurse driven features like, cord-wraps, keyboard lights for charting at night, paper feeds and additional storage allow Amico products to work for you.

Whether it be a custom color, dimension, or design, we want to work with you to design the product that is uniquely for you.

Touchpad Light for Night-time Charting

Matching Finishes for that "Hotel Feel"

Fetal Monitor Carts

Our Fetal Monitor Carts are aesthetically pleasing carts that conceal medical monitoring systems in Labor and Delivery environments. These units can be fully customized to suit clinicians' needs and are made to match the existing casework in the room. Since the dimensions can be customized, these carts can be made to fit the exact requirements for the latest hardware available on the market.

Baby Bassinets

Amico's Bassinets are crafted using the highest quality materials designed for long lasting durability to create a home-like environment in labor and delivery departments. Available in high-pressure laminate or seamless thermofoil finishes, our bassinets can be customized with various drawer and door configurations, as well as hardware options and additional features for charts and writing surfaces.

Delivery Carts

Made in seamless thermofoil and high-pressure laminate, our delivery case carts can be customized with drawers, cupboards and even pass through capabilities. With the addition of flip up side tables, the top surface can be extended to hold additional supplies. Matching the color finish to the built in casework ensures that these clinical pieces look anything but institutional in a beautiful labor and delivery suite.

Height Adjustability for Patients and Clinicians

Unmatched Safety and Closeness

Height Adjustable Labor and Delivery Suite

Amico understands that the moment of Labor and Delivery can be stressful. When time is tight, the clinical team needs to be in the best position to care. To help, we created the first series of height adjustable labor and delivery equipment in the market. Our Sit-to-Stand fetal monitor cart allows the nurse to work seated or standing. The height adjustable delivery cart allows for unprecedented nurse and doctor access to really fit into your labor situation. Our fully height adjustable bassinet is not only great for nurse ergonomics, but allows Mom to get close to the baby while in bed, keeping the mother/baby interaction safe and comfortable.

Achieve Your Perfect Working Height

Ergonomic Designs

Custom Carts

Access to supplies is a constant need for hospital caregivers. When designing or renovating an area, most facilities are left to pick from the "red, blue or yellow" metal supply cart. A lot of detail and time are put into the look and feel of a room and Amico can integrate with your aesthetic, but still make carts that are able to handle all of the day to day supplies. No more compromise, let's design a cart that is unique to you and your environment.

Supply Carts – Selene and Chloe Series

Our carts offer an aesthetically pleasing solution to house the supplies you need, where and when you need them. Our Supply Carts can be manufactured in any size, with any combination of drawers and cupboards to suit the needs of your environment. Matching the laminate to the current room décor, these carts provide a less “clinical” solution for the healthcare environment.

IT Carts – Mercury Series

Our non-powered, height adjustable IT Carts are designed with flexibility and customization in mind. By combining laminate or thermofoil cabinetry with a height adjustable work station, we are able to provide the bedside charting you need in a design that complements your room décor. With integrated rails to mount accessories, and an automatic gas cylinder for easy height adjustment, this cart provides unlimited flexibility. With custom sizes available, our lightweight IT Carts can fit into any space and suit any application.
